As such, it is the first, and only, book of its kind. Aust provides a wealth of examples of the problems experienced with treaties on a daily basis, not just when they are the subject of a court case. He explores numerous precedents from treaties and other related documents, such as memorandums of understanding (MOUs), in detail. Using clear, accessible language, the author covers the full extent of treaty law, drawing examples from both treaties and MOUs. *Modern Treaty Law and Practice* is essential reading for teachers and students of law, political science, international relations and diplomacy, who have an interest in treaties.

Brudner, Alan, *The Unity of the Common Law 2nd ed*, Oxford University Press, Hardback, £60.00, [ISBN: 9780199592807](http://www.wildy.com/ISBN/9780199592807). In this thoroughly revised and re-written edition of his classic book *The Unity of the Common Law: Studies in Hegelian Jurisprudence*, Alan Brudner draws on Hegel's legal philosophy to exhibit this unity in each of transactional law's main divisions; property, contract, unjust enrichment and tort. Brudner suggests each of these divisions is composed of private-law and public-law parts that complement each other and that they are connected by a single narrative thread. This thread consists in development towards a goal. The goal is the dignity that comes with the attainment of the legal conditions necessary and sufficient for reconciling dependence with independence. Thus the end point is what a transactional law can contribute to a life sufficient for dignity.

Calnan, Richard, *Principles of Contractual Interpretation*, Oxford University Press, Paperback, £34.99, [ISBN: 9780199681464](http://www.wildy.com/ISBN/9780199681464).

This concise new book explains and re-evaluates the rules of construction at a conceptual level and explains clearly the principles which guide the courts in interpreting contracts and the associated practical implications. The work sets out the principles and considers each in turn providing examples of how they operate in practice. It covers difficult legal issues faced by the courts (such as the status of an agreement to agree) and the effect that these principles have on the drafting and reading of contracts.

These two volumes collect together the main body of work from one of the most influential constitutional law theorists in the field. It is essential reading for any student of English and comparative constitutional thought.

IMPORTANT FORTHCOMING PUBLICATIONS

Securities Law 2nd edition
by Professor Alastair Hudson
Sweet & Maxwell, Hardback, ISBN 9780414028456, £220.00, due November 2013
Securities Law is a comprehensive treatment of securities regulation, covering the full range of securities issues including shares, bonds and securitised derivatives, providing practitioners with an in-depth guide to how everything works and fits together. Covering both UK and EU regulation of securities, the new edition analyses the impact of the Financial Services Act 2012 on securities law in the UK, and the effect of the Larasiere Report on securities regulation across the EU, as well as explaining the implication of MiFID, Prospectus Directive, Transparency Obligations Directive, and the most recent version of the FCA Handbook. The book also explains the criminal law on insider dealing, fraud under the Fraud Act 2006, general offences under FSMA 2000, and the regulation of market abuse more generally. Other topics covered include the regulation of the Alternative Investment Market (AIM), the securities law implications arising from takeovers,

the allotment of shares and other company issues, and the application of corporate governance norms to securities regulation.

Brooke's Notary 14th edition

by Nigel Ready
Sweet & Maxwell, Hardback, ISBN 9780414028388, £235.00, due November 2013.

Brooke's Notary is the standard work on notarial practice, first published in 1839. It provides comprehensive guidance on all the main areas of notaries' practice, including powers of attorney, affidavits, declarations and ship protests, bond and debenture operations, and share issue ballots, and covers notaries in England & Wales, the Commonwealth and international jurisdictions. This new edition brings the coverage up-to-date with the latest developments and reviews their impact on day-to-day practice. In addition to covering the functions and powers of notaries, it explains the procedure for admission as a notary, the different classes of notary, and the training and appointment of notaries. English language precedents on bills of exchange, ship

protests, notarial certificates and affidavits and statutory declarations are included, as are French, Spanish, Portuguese, Italian and German forms relating to power of attorney.

Modern Maritime Law 3^{ed}
by Aleka Mandaraka-Sheppard

Informa Law, Hardback, 2 Volumes, ISBN 9780415843201, £250.00, due November 2013

This unique title examines in depth issues of jurisdiction, maritime law and practice from a modern perspective and highlights the importance of risk management with a view to avoiding pitfalls in litigation or arbitration and minimising exposure to liabilities. The third edition has been fully revised and restructured into two self-contained volumes, the first covering jurisdictional issues and risks and the second exploring the diverse aspects of maritime law, risks and liabilities. The new edition continues to provide succinct analysis of the key principles and precedents of maritime law, a detailed account of important decisions, and incorporates developments in regulation, Codes

of good practice and international Conventions. Volume 1, *Jurisdiction and Risks*, tackles a wealth of complex jurisdictional aspects, ranging from the enforcement of maritime claims to a detailed analysis of the conditions of arrest of ships, including reconsideration of wrongful arrest, beneficial ownership, forum non-convenience and limitations upon the jurisdiction of the English courts. Volume 2, *Managing Risks and Liabilities*, tackles the substantive maritime law with a particular emphasis on risk and liabilities, and analyses issues of contract, tort and criminal law, causation and remoteness of damages. Submarine Cables: The Handbook of Law and Policy

Edited by Douglas R. Burnett, Robert C. Beckman, and Tara M. Davenport
Martinus Nijhoff, Hardback, ISBN 9789004260320, £125.00, due November 2013
Submarine fiber optic cables are critical communications infrastructure for States around the world. They are laid on the seabed, are often no bigger than a garden hose, and transmit immense amounts of data across oceans. These cables are the backbone of the internet and phone services and underpin core State interests, such as the finance sector, shipping, commerce and banking industries. Without the capacity to transmit and receive data via submarine cables, the economic security of States would be severely compromised. Despite the fact that 95 per cent of all data and telecommunications between States are transmitted via submarine cables, there is little understanding of how these cables operate. As a result some States have developed policies and laws that undermine the integrity of international telecommunications systems. *Submarine Cables: The Handbook*

of Law and Policy provides a one-stop-shop of essential information relating to the international governance of submarine cables. The Handbook is a unique collaboration between international lawyers and experts from the submarine cable industry. It provides a practical insight into the law and policy issues that affect the protection of submarine cables, as well as the laying, maintenance and operation of such cables. In addition, the law and policy issues in relation to other special purpose cables, such as power cables, marine scientific research cables, military cables, and offshore energy cables, are also addressed.

Negotiating the International Criminal Court: New York to Rome, 1994-1998

By Fanny Benedetti, Karine Bonneau and John Washburn
Martinus Nijhoff, Hardback, ISBN 9789004209299, £118.00, due November 2013
This is the story and analysis of the unforeseen and astonishing success of negotiations by many countries to create a permanent international court to try atrocities. In 1998, 120 countries astounded observers worldwide and themselves by adopting the Rome Statute for an International Criminal Court. From this event began

important and unprecedented changes in international relations and law. This book is for those who want to know and understand the reasons and the story behind these historic negotiations or for those who may wonder how apparently conventional United Nations negotiations became so unusual and successful. This book is both for those who seek detailed legislative history, scholars or practitioners in international law and relations and those simply curious about how the Court came about.

Fiduciary Duties: Directors and Employees 2nd edition

By Andrew Stafford QC and Stuart Ritchie

Jordan Publishing, Hardback, ISBN 9781846615580, £157.00, due December 2013 This new edition brings together in one volume the law relating to fiduciary duties owed by directors and employees to companies, and analyses both the historical origins and the modern application by the Courts. Fiduciary duties have historically defied easy characterisation, and the law as it relates to directors and employees is developing and complex. Directors and employees of companies acting out of self-interest have generated an increasing number of claims alleging breach of fiduciary

duty. Individuals in positions of trust within a company are often tempted to abuse their position in order to steal company secrets, set up in competition, and poach staff and customers. This new edition of *Fiduciary Duties* contains commentary on a number of new cases alongside further commentary and analysis on the developing jurisprudence in relation to the fiduciary duties of LLP members and joint ventures. In addition discussion is conducted regarding the Court of Appeal decisions relating to Bolckiah information barriers in an employment context, together with evaluation of the relevant Commonwealth jurisprudence as it bears upon issues also arising under English law. As a result this new edition of *Fiduciary Duties: Directors and Employees* is an essential research reference for anyone practicing in this area of the law.

Digital Copyright: Law and Practice 4th edition

By Simon Stokes

Hart Publishing. Hardback, ISBN 9781849464024, £45.00, due December 2013 The first edition of this book in 2002 was the first UK text to examine digital copyright together with related areas such as performers' rights, moral rights, database rights

and competition law as a subject in its own right. Updated editions have included the UK implementation of the 2001 Copyright Directive and commentary on user-generated content and the development of Web 2.0 and beyond. Now in its fourth edition, the book has been updated and revised to take account of legal and policy developments in copyright law and related areas, in particular the increasing role of the European Court of Justice in shaping EU copyright law. The book helps put digital copyright law and policy into perspective and provides practical guidance for those creating or exploiting digital content or technology, whether in academia, the software, information, publishing and creative industries, and other areas of the economy. The focus is on the specifics of the law in this area together with practical aspects, including precedents and precedent checklists dealing with common digital copyright transactions. The latest edition has been expanded to include a discussion of Open Access, eBooks and App development and licensing. Both academics and practitioners will find the book an invaluable guide to this rapidly developing field of law.

Free and Open Source Software: Policy, Law and Practice

Edited by Noam Shemtov and Ian Walden

Oxford University Press, Paperback, ISBN 9780199680498, £95.00, due November 2013

Free and Open Source Software (FOSS) is realised through legal instruments, private law agreements, licences, promises, and community norms. These private law instruments reside within a public law framework that grants exclusive and monopoly rights to creators of intellectual property. Written by FOSS experts, this work delivers an in-depth examination of the legal and commercial structures relating to the usage and exploitation of FOSS software. FOSS has become an increasingly important component of the ICT industry, embodied in the products that we use and the systems we depend on. Major industry players such as IBM have embraced FOSS and it impacts on all its users. This work will enable readers to understand the legal environment within which FOSS operates. The first part examines FOSS in relation to the key IP regimes. The commercial implications of FOSS are then examined

from different components of the supply chain. The final part examines the implications of FOSS for policy makers.

The Law of Pension Trusts

By David Pollard

Oxford University Press, Hardback, ISBN 9780199672486, £125.00, due November 2013

This book on the law of pension trusts comprehensively fills a gap in the provision of good commentary on pensions law, both from a practical and scholarly perspective. Responding to a paucity of up-to-date publications in this area, David Pollard provides the most detailed treatment available of trust law as it relates to occupational pension schemes. The book provides answers to difficult problems in pensions law often not covered by statute, including trustees' obligations to employers, how spouses and dependents rank as beneficiaries and implied duties owed by employers. Pollard deals with the issues of most concern to practitioners in pensions law, including trustees' investment and amendment powers, and trustee investment duties. This practical guidance is supported and enhanced by incisive academic analysis.

Written by a leading pensions practitioner, this book is a must have for all practitioners and scholars in the field.

LAW AND PRACTICE OF CHARGING ORDERS ON LAND

Falcon Chambers

Price: £85.00
ISBN: 9780854901241
Extent: 308 pp
Binding: Hardback

Written by specialists with practical experience, *Law and Practice of Charging Orders on Land* provides a clear and thorough analysis of the law applicable to charging orders on land. Such orders are frequently sought, but can give rise to difficult issues both in terms of the exercise of discretion by the courts, and in relation to priorities. The book provides a guide to practitioners as to the pitfalls that can arise in seeking or challenging a charging order. There is comprehensive citation of authority and reference to statutory materials and the relevant provisions of the Civil Procedure Rules.

The book explains the history of the law on charging orders which culminated in the Charging Orders Act 1979. It explains how to apply for a charging order and how the court is likely to exercise its discretion on such an application at both the interim and final stages. It considers the often difficult issues of priority that can arise in relation to charging orders. It explains how a charging order, once made, may be challenged and examines the process whereby a charging order may be enforced through an order for sale. It also looks at other cognate forms of order which create a charge over land and contains examples of relevant documents.

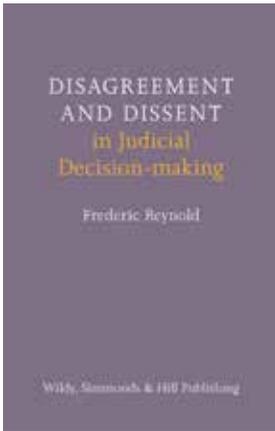

Law and Practice of Charging Orders on Land is an up-to-date treatment of this area of law, covering practical issues and giving examples. It addresses the very difficult legal issues that can arise and provides guidance as to how they might be dealt with.

All the contributors are barristers practising at Falcon Chambers in London, the leading set that specialises exclusively in land law and landlord and tenant work.

DISAGREEMENT AND DISSENT IN JUDICIAL DECISION-MAKING

Frederic Reynold

Price: £45.00
ISBN: 9780854901272
Extent: 229 pp
Binding: Hardback

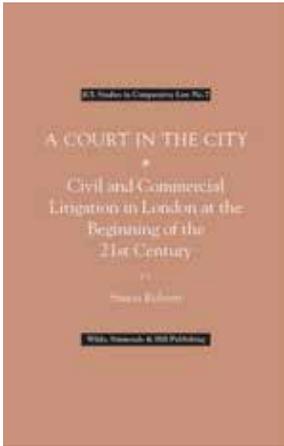

Frederic Reynold provides an engaging analysis of disagreement and dissent in judicial decision-making. He explores the root causes of disagreement in cases decided over the last 25 years or so in the House of Lords and the Supreme Court, and the light they throw on the character of judicial decision-making at this level.

Disagreement and Dissent in Judicial Decision-making seeks to provide answers to a number of topical questions:

- To what extent, if any, have judges observed the distinction between legal policy (a legitimate matter of concern to them) and public policy (which generally speaking is not)?
- Can a non-lawyer be in a position to assess the merits of the competing views of the majority and the minority?
- Can one talk in any meaningful sense of achieving “a balance” in the membership of the Supreme Court?
- Is the UK Supreme Court, in terms of character and function, heading in the direction of the US Supreme Court?

Split decisions of the law lords and (since October 2009) justices of the Supreme Court have always exercised a particular fascination, and especially those decisions featuring a bare majority. The analysis given here will throw light on a number of topical concerns, eg: the balance in the composition of, and the appointment of justices to, the Supreme Court; and the boundaries between judicial and political decision-making.

Frederic Reynold has enjoyed a long career at the Bar, specialising in employment and contract law and related areas. He has appeared in several landmark House of Lords cases as well as more recently in the Supreme Court. In the course of his career he has advised the Equal Opportunity Commission, the BMA (on contractual and disciplinary issues concerning consultants and doctors), and the Royal Institute of Chartered Surveyors (in respect of professional standards and practice). He was appointed a QC in 1982 and elected a Master of the Bench of Grays Inn in 1991. He is a member of the Industrial Law Society and the Employment Lawyers Association.

JCL Studies in Comparative Law No. 7

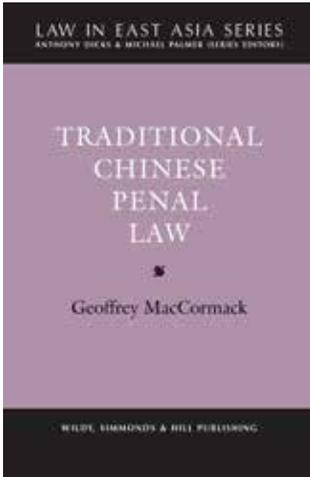

Simon Roberts

Price: £65.00
ISBN: 9780854901319
Extent: 180 pp
Binding: Hardback

This is a study, from a sociological/anthropological perspective, of the shifting emphasis in English civil justice from adjudication to settlement and mediation.

It gives particular attention to the work of the Mayor's and City of London Court, contextualizing some of the findings of the author's recent fieldwork there, in a discussion of the broader transformations that have taken place in both civil justice and the anthropological and sociological discourse about the nature of law and its place in society. Situated next to the Guildhall, in the heart of the city, the Mayor's and City of London Court claims to be the oldest civil court in England. This volume examines the contemporary work of the court in sponsoring settlement against the backdrop of a Victorian building constructed to deliver trial and judgment.

Simon Roberts has taught at the LSE since 1964. His main teaching and research interests are in the anthropology of law, the law of property and the field of alternative dispute resolution.

TRADITIONAL CHINESE PENAL LAW

Revised Edition

Geoffrey MacCormack

With a Foreword by
Michael Palmer

Price: £65.00
ISBN: 97808549010930
Extent: 332 pp
Binding: Hardback

The penal law of the imperial period—from roughly 200 B.C. to 1911 A.D.—is of particular interest, although little known or studied in the West, because each of the great dynasties produced codes which functioned both as instruments of government and as a means for the enforcement of Confucian morality. The content of the codes—untouched by Western influences—remained on many important topics largely unchanged from at least the seventh to the twentieth century.

This book discusses the social, intellectual and administrative background of the codes, analyses their structure and gives an account both of the general rules they contain and of the rules in the most important specific areas regulated by them (for example, killing, physical injury, theft, damage to property, marriage, adoption and succession). It also discusses some important branches of administrative law such as the liability and privileges of officials. A final chapter takes up the theoretical issue of the nature of the penal law.

Originally published in 1990, this widely accepted classic has been corrected and revised by Professor MacCormack.

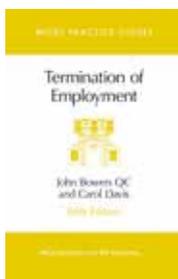

Geoffrey MacCormack is Emeritus Professor of Jurisprudence at the University of Aberdeen.
